## **DETAILED ACTION**

### ***Response to Election/Restriction***

1. Applicant's election with traverse of claims 21-46, 60-72 and 77-80 in the reply filed on 10/24/2007 is acknowledged. The traversal is on the ground(s) that the inventions are sufficiently related and therefore the required search is not a serious burden on the Examiner. This is not found persuasive because as detailed in the previous office action, there are structural differences between each invention and each group represents a separate and distinct invention.

It appears that applicant believes the issue of burden only arises from the search of prior art and examination of the application in determining the patentability of the claimed invention. However, applicant is respectfully reminded that conducting a search on application merely plays a small part of examining the invention. Burden may also arise from prosecuting multiple inventions in a single application. Such a type of prosecution merely leads to complication in patentability determination that may ultimately sacrifice the quality of patentability determination.

The requirement is still deemed proper and is therefore made FINAL.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “**cell**” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet,

Art Unit: 2886

even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. Claims 21-46, 60-72 and 77-80 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term “cell” is neither defined in the specification nor shown in any of the drawings. This has made the claims vague and indefinite.

Since “cell” is an essential part of the claimed invention, it is not possible to do a thorough search or a proper examination without a full understanding of what the applicant is claiming. In view of the above, an examination of the claims will be made after the applicant makes appropriate corrections to overcome the above deficiencies.
